Key Success

Data Analytics are the key, Coral Team consists of Data Scientists and Professional Consultants in Total Cost of Ownership (TCO), Activities Based Costing (ABC) analysis for Corporate spending under different account assignment e.g. Asset, Expense, Inventory, Project etc.

With holistic view, we will show Clients on
"How to improve their processes"

starting from Source-Procure-Pay with quantifiable benefits, leads to improve in EBITDA by lowering Clients's spending.

Pantavanij | www.pantavanij.com

5 - 10%* reduce by using Consolidated Volume or Committed Volume,
resulted from Supply Chain improvement

3 - 5% reduce by improving Logistics management

3 - 4% reduce by better Demand Planning

► Use Case : Difference Price Management

► Background and Process

- Central Procurement usually monitor on Standard Price by using Contract Management but in the reality, individual plant can make maverick local purchase decision by avoiding Contract Price.
- Procurement Department can monitor Difference in Unit Price by using Fraud Detection Technology.

► Result

- Material Code (MatCode) represents distinct material or service identity, therefore, by analysis on CPM (Contract Price Management) data, Price Difference for same location, can be found by using algorithm to detect price discrepancies to create standard Purchasing Price

CORAL team has experiences in Developing Strategy and implementing Cost Reduction Program with both Global and Thailand Leading Corporate in Manufacturing, Service Operator Sector.
